# ClearSkies™

# THREAT DETECTION, INVESTIGATION & RESPONSE PLATFORM

ClearSkies™ TDIR platform takes a risk-based approach to help organizations minimize Attackers' Dwell-Time, simplify the investigation process, prioritize response actions thus optimizing SOC operations. The platform centralizes the analysis of alerts generated from disparate technologies to help you streamline your incident management and response, identify weak technology implementation and maximize the efficiency of scarce security personnel.

## FOR MSSPS
Offer top quality, uniquely positioned Managed Services

- Centralized Management ✓
- Multitenancy ✓
- Stand out from your competition ✓
- Simplify Investigation and response actions ✓
- Monitor asset health and availability ✓
- Streamline alert prioritization and incident management ✓
- Simple and Scalable delivery model, pay as you Grow ✓

## FOR ENTERPRISES
Effectively Investigate and Respond to emerging threats and vulnerabilities

- ✓ Empower the efficiency and effectiveness of your security teams
- ✓ Centralize and organize alerts generated from disparate technologies
- ✓ Access to contextual Threat Intelligence
- ✓ SImplify alert analysis and incident investigation
- ✓ Enhance legal and regulatory compliance
- ✓ Effective automation and orchestration of response actions

By utilizing machine learning and artificial intelligence in innovative ways, the ClearSkies™ TDIR platform accelerates the rate at which you anticipate, detect, investigate and respond to sophisticated cyber, insider and third-party threats.

**Threat hunting** for proactively identify previously unknown, or ongoing non-remediated threats

**Extend your detection and response** capabilities with XDR

**Cross-layered visibility** with contextual information

**Automate and orchestrate response actions**

# CLEARSKIES™: UNLOCK THE INTELLIGENCE OF YOUR DATA
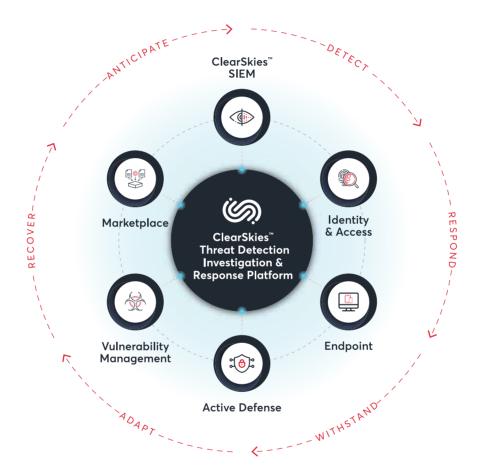

## Intelligent
Identifies patterns of suspicious/ malicious behavior that would otherwise go unnoticed.

## Innovative
Our products are constantly enhanced with innovative features and add-ons.

## Scalable
Scalable service delivery model which allows full control over your security budget.

ANTICIPATE · DETECT · RESPOND · WITHSTAND · ADAPT · RECOVER
