

AI-Powered Managed Services

Built for Modern Threats

Why it Matters

Empower your organization with cybersecurity that thinks, adapts, and responds in real time. Our Managed Services unite Security Operations and Technology Resilience, elevated by AI-powered SOC analysts through the **ClearSkies™** TDIR Platform.

THE CHALLENGE

What organizations face today

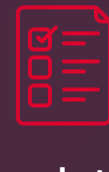

Alert Fatigue

Evolving Threats

System Complexity

Regulatory Pressure

HOW WE ADDRESS THESE CHALLENGES

SECURITY OPERATIONS

Detect | Investigate | Respond | 24/7

Detecting AI-driven threats across hybrid environments

Automating investigation workflows with contextual intelligence

Monitoring activity in real time by expert SOC analysts

Responding rapidly to incidents using adaptive playbooks

TECHNOLOGY RESILIENCE

Secure what matters | Recover what counts

Strengthening business continuity & disaster recovery strategy

Managing patching, backups & configurations

Hardening systems & detecting misconfigurations

Assessing and testing cyber resilience levels

Supporting regulatory compliance (ISO 27001, NIS, PCI DSS, etc.)

THE **ClearSkies™** AI ADVANTAGE

AI-augmented analysts

for faster triage & reduced alert fatigue

Adaptive learning

from every incident

Correlated threat incidents & attack-path analysis

Consistent decision-making under pressure

THE RESULT?

Here is what you get when you combine AI + human intelligence

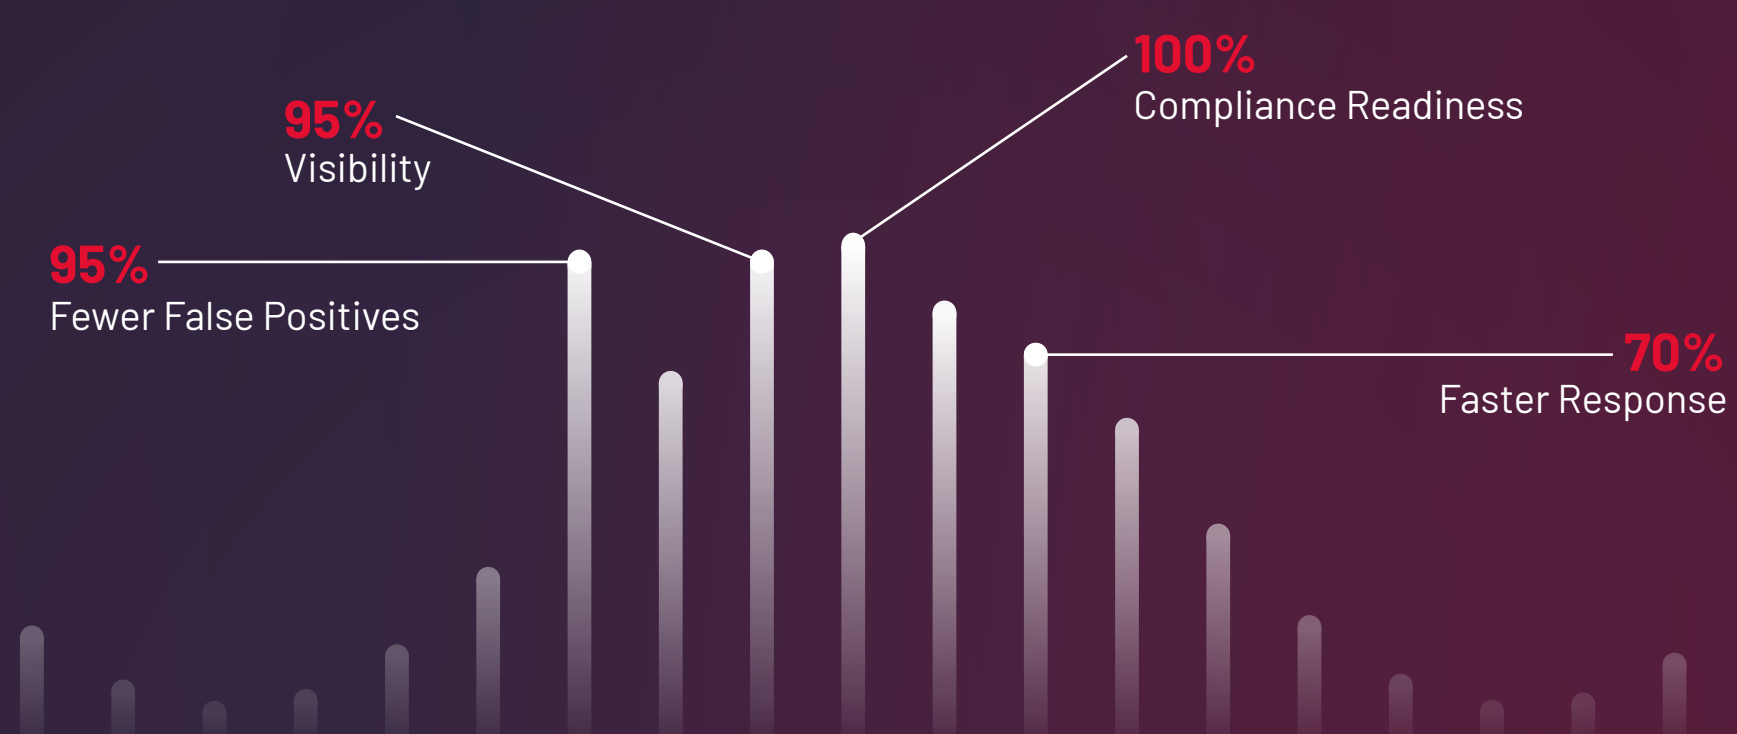

Faster & smarter threat detection

Deeper & more accurate investigations

Stronger resilience across your entire ecosystem

Ready to scale your security with the **power of AI** and human intelligence?
